

## ENGLISH

EVAUBANC (Evaluation of Assisted Ventilation on a Simulation Bench) is a consortium of experts and cutting-edge technological resources dedicated to the evaluation of respiratory accessories and equipment. Our mission is to advance knowledge to enhance patient therapies, improve patient outcomes, and positively impact public health and the environment.

Our research board consists of:

- Pr Capucine Morelot
- Pr Jésus Gonzalez-Bermejo
- Pr Hélène Progent
- Pr Marjolaine Georges
- Dr Claudia Llontop
- M. Alexis Mendoza-Ruiz

We are mainly focused on the following aspects:

- Evaluating the equipment and accessories used in respiratory assistance ventilators.
- Assessing the performance of medical devices for respiratory assistance in common events.

Education is also one of our key objectives. We offer practical internships to students, helping them to reinforce their knowledge of breathing. Since the inception of EVAUBANC, we have hosted students from various countries, including Colombia and Italy.
